

Advanced Filtration Solutions For Sustainable Campuses

At educational institutions, reliable, clean, and great tasting drinking water is essential as busy students and staff need to remain hydrated. With a wide variety of Culligan Quench bottleless water dispensers, those hydration needs can easily be met all over campus.

Environmentally conscious students are ditching the single-use water bottles, replacing them with reusable water bottles that do better for their wallets and the environment. Colleges and Universities are joining student sustainability efforts by switching to bottleless water coolers from Culligan Quench. Culligan Quench's bottleless water coolers eliminate the need for 18.9-litre / 5-gallon jugs and plastic single-serve bottles from campuses and schools while also reducing their carbon footprint.

Advanced Filtration Solutions

Many schools operate in old buildings, which means water is running through old pipes and picking up any contaminants along the way, including lead.

Culligan Quench's state-of-the-art filtration can reduce up to 99.9% of lead in school water amongst other impurities, like sediment and chlorine, and eliminate off-tastes and odours to provide users with clean, great-tasting water.

Filtered water

On-demand filtered water dispensers for libraries and study halls.

Sparkling & Flavoured Water

Flavoured and sparkling water machines for cafeterias and dining halls.

Ice

Advanced filtration water and ice machines for athletic facilities and gyms with quenchWATER+ to aid in hydration and post-workout recovery.

Education's Most Trusted Filtered Water Provider

Culligan Quench is the leading water-as-a-service solution to over 400 school districts, secondary schools, colleges and universities coast-to-coast. Education customers choose Culligan Quench as their preferred partner because of our depth of hydration solutions, our national reach, and world-class service.
